The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/519,197	<b>Applicant(s)</b> OSAKADA ET AL.	
	<b>Examiner</b> D. Margaret Seaman	<b>Art Unit</b> 1625	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 29 February 2008.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### DETAILED ACTION

Claims 17-27 and 32-33 have been canceled. Claims 1-16, 28-31 and 34-48 are before the Examiner.

#### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. The rejection of claims 28-31 and now new claims 39-48 under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement, as stated in paper dated 8/31/2007, is upheld. As previously stated, the claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The instant specification does not adequately describe the nexus between the inhibition of the PDE 10a receptor and a useful treatment of a disease/condition. There are no working examples of the instantly claimed compounds or of compounds having this PDE10a activity treating or preventing any disease, or specifically treating or preventing dyskinesia or tumor growth. It is not seen where the instant specification adequately describes the nexus

between the inhibition of the PDE 10a receptor and a useful treatment or prevention of a single disease or condition.

The rejection of claims 28-31 and now new claims 39-48 under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement, as stated in paper dated 8/31/2007, is upheld. As previously stated, the claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. In re Wands, 858 F.2d 731, 737, 8 USPQ2d 1400, 1404 (Fed. Cir. 1988).

Applicant argues in paper dated 2/29/2008, that there is a well known relationship between PDE activity and disease or condition in mammals. Specifically diabetes insipidus or cellular proliferation. However, applicant states that Deonarain suggests that a tumor targeting approach to cancer treatment that involves PDE is promising. However, this does not equate to general acceptance that PDE inhibition leads to cancer treatment or treatment of diabetes. This does not overcome the lack of enablement that was established in the first office action dated 8/31/07. Due to this, the claims remain rejected under written description and enablement.

*Allowable Subject Matter*

3. Claims 1-16 and 34-38 are free of prior art and have enablement.

*Conclusion*

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
